

7.2.1 Describe two best practices successfully implemented by the Institution as per NAAC format provided in the Manual

1. Title of practice : Planting of Saplings

This practice is a huge importance in making our environment pollution free. It makes our campus clean and green. It helps in creating peaceful environment for our student and other staff members. The college students and staff do sapling plantation every year in the college campus as well as in the surrounding villages during the rainy season. The institute not only plant sapling but also take care of them till further growth. Since this college is located in Sandy area with red soil. It absorbs the water easily due to which the surface becomes dry quickly, it takes more care and protection for plantations of saplings so it is necessary to bring fertile soil from outside and mixed properly with manure so that plants can grow well and remain healthy. Some work is done in this context while some work still needs to be done.
